Faithfulness deletion curves with the corrected LIME arm (higher = more faithful)
corrected LIME (red) vs committed SHAP (blue) / IG (green) vs the void arm FIRST10 (purple dashed) vs random (grey dotted); bold = transformer, faded = tfidf/ensemble
FIRST10 is the void arm relabelled as a position baseline (the document's first 10 word tokens, not LIME)
d1_sb (TEST n=7,776; explained n=200)
d2 (TEST n=4,384; explained n=200)
d3_en (TEST n=2,875; explained n=200)
comprehensiveness (drop in p_predicted)
k tokens removed
